Scientific profile

Having obtained my general dentistry qualification in 2012, I pursued advanced studies in the field of oral medicine specialization. Graduating as the top-ranked student in 2017, I subsequently practiced as a clinical professional until 2021. At present, I am deeply engaged as a Ph.D. student, dedicated to enhancing my research expertise and skills in the realm of orofacial pain.

Educational and career background

Current position:

March 2022 – present

Ph.D. student.

Name and location of institution: Section for orofacial pain and jaw function, department of dentistry and oral health, Aarhus University, Denmark

Project title: Epigenetic and nutritional risk factors for painful temporomandibular disorders.

Clinical experiences:

September 2017 – December 2021

Clinical practitioner.

During my employment at Bahonar Hospital, Kerman University of Medical Science in Kerman, Iran, I administered treatments to patients suffering oral mucosal diseases, orofacial pain, and temporomandibular disorders. Additionally, I contributed my expertise to Roshon dental clinic, a private practice located in Kerman.

Postgraduate:

September 2014 – August 2017

Residence of oral medicine.

Name and location of institution: Department of oral medicine and orofacial pain, dental school, Kerman University of Medical Sciences, Kerman, Iran.

Degree received: M.Sc.

Thesis title: Comparing the effect of chronic facial pain on tendency to morphine and cannabinoid in conditioned place preference in male rats.

Undergraduate:

September 2006 – July 2012

General dentistry education.

Name and location of institution: Dental school, Kerman University of Medical Sciences, Kerman, Iran.

Degree received: DDS.

Thesis title: Assessment of relationship between xerostomia and oral health-related quality of life in patients with rheumatoid arthritis.

Honors and awards

- Iranian Board of oral medicine, Iran, 2017
- Ranked 1st (top student), among all postgraduate students graduated in the same year (2017).
